BioTroop Boost

Septic System Treatment Kit
One time Booster + Monthly Package

Usage

BioTroop Boost is a powder based, highly effective natural conditioner that keeps your septic system or waste tank in top condition. It efficiently eats organic material, including food-derived fats and oils. Use the product to maintain a high level of biological activity in your system. Regular use reduces the amount of biological waste and sludge in the system or tank and clearly prolongs the need to empty them. By using the product regularly, costs are saved, the pipeline remains free of blockages and there are no unpleasant odors.

Product Type

White powder packed in water soluble sachets

Contents

The product package contains 1 x 100 gr Booster booster, the sachet of which contains approximately 300 billion probiotic bacteria PLUS microbial nutrients.

The monthly dose package contains 12 x 20 gr each containing approximately 60 billion probiotic bacteria PLUS microbial nutrients.

GMO-free (Does not contain genetically modified microbes). Animal-derived materials are not used in any processing phase

pH 7.0 (Neutraali)

Instructions for use and getting started

For faster results, use the BioTroop Boost starter pack to activate the system and then use one BioTroop Boost 20g sachet per month.

1. Drop one water-soluble BioTroop Boost dose bag into the toilet bowl. Let the flushing water stand for at least 10 minutes so that the bag dissolves and the microbes it contains dissolve effectively
2. Flush the toilet. Rinse again if necessary to remove any residue. Avoid over-flushing the toilet for a few hours, which helps the microbes to colonize the drain and also improve their cleaning power before they reach the sewage system itself
3. Repeat the process regularly every month, adding one sachet as instructed

Dosing

In normal use, the BioTroop Boost monthly package is suitable for maintaining the systems of a household of 4-5 people. In heavy use and in households of 5-10 people, use 2 sachets per month or dose every 2 weeks.

Product Code

160653

Packing Size

1 x Box

GTIN

6429810806079

Waste Handling

Empty plastic packaging and packaging waste can be disposed of together with energy waste or by delivering them to a recycling point.

Storage and Handling

Store in a cool and dry place. Although BioTroop Boost is 100% biodegradable, non-toxic and safe for humans, animals and the environment, we recommend avoiding eye contact, inhalation or ingestion and washing hands after handling the product.

Country of origin

Finland
