

# Power Plumber

## Drain opener

### Purpose of use

Power Plumber is a fast solution for all types of clogged drains, such as sinks, bathtubs, toilets, and floor drains. The product clears blocked or slow-flowing drains in a few seconds without the use of hazardous chemicals.

Power Plumber contains gas that expands upon contact with water. This leads to the formation of a surge, which cleans the drain up to a distance of 20 meters with precisely controlled pressure.

### Characteristics

Pressurised gas.  
Drain opener can be used up to 15 times.

### Contents

Refer to the detailed information in the separate safety data sheet.

### Usage Instructions

Place Power Plumber in the clogged sink or drain and fill it with water until the cap is submerged, or fill water directly into the cap. Press the canister against the drain for approximately 1–2 seconds, and repeat if necessary. When opening, it's advisable to have a towel over the overflow opening to prevent water splashing. Use the Power Plumber rubber adapter for floor drains and toilet blockages.

Note: If the blockage is not cleared after the third attempt, contact a professional plumber. Do not use in clogged pipes containing acid residues or other strong chemicals, as splashes can cause skin and eye corrosion. Be cautious near adjacent drains, as pressure may cause water to rise through them.

For professional use only.

| Product Code | Packing Size | Batch | GTIN          |
|--------------|--------------|-------|---------------|
| 160644       | 150 ml       | 12    | 6429810806208 |

### Waste Disposal

An empty metal container can be delivered to metal recycling. Empty plastic parts can be disposed by incineration or taken to a recycling center. Transport packaging is either incinerated or recycled.

### Storage

Store in a cool, dry place.

### Country of origin

Denmark
