

BioTroop FlyBye

Biological pipe maintenance product for drain fly control

Purpose of use

A pipe maintenance product containing microbes, designed to control drain flies and other insects living in piping systems.

The microbes in the solution eliminate conditions that are ideal for insects by breaking down waste and reducing surface tension in water. As a result, the piping remains clean and free of insects, as they can no longer breed in the pipes.

BioTroop FlyBye is safe for both the environment and humans and does not burden wastewater systems.

Features

- Mildly scented solution
- Removes unpleasant odors
- Biodegradable, environmentally friendly, and compatible with biological wastewater treatment plants

Contents

See the separate safety data sheet for detailed information. pH 7.

Product No.	Package size	GTIN
161640	20 l	06429810806000

Waste handling

Empty plastic containers can be disposed of by delivering them to a recycling point.

Storage

Store at room temperature

Country of origin

Finland

Instructions for use

Used with an automatic SmartPipe DPT cap pump or a similar dosing device.

The dosage depends on the size of the system and the total daily wastewater volume.

When handling microbiological products, special attention must be paid to cleanliness and hygiene. Close the container after use. Protect the suction hose from dirt and clean it regularly.
