BioTroop FreeFlow

Effective deposit remover for pipework

Intended use
Strongly acidic BioTroop Freeflow dissolves mineral and urine scale deposits. It is used preventively to keep pipework clean, either with automatic dosing equipment or through manual dosing.

Appearance
Unfragranced liquid
Strongly acidic, pH 2.2.

Contents
Citric acid 30–<50%, lactic acid 5–<15%, amphoteric surfactants <5%.

Directions for use
Automatic dosing: For preventive treatment using an automatic SmartPipe dosing unit, dose 10 ml/h/dosing unit. If BioTroop Sani is used at the same time, dose 5 ml/h/dosing unit. To remove more stubborn deposits, dose 40ml/h/dosing unit.

Manual dosing: Pour 500ml of the product into the toilet units at the far ends of the pipework as a periodic treatment when needed.

Contact a SmartPipe representative for detailed dosing instructions and information about dosing equipment.

Waste disposal
Empty, clean and dry plastic packaging can be taken to a plastic packaging collection point. Clean cardboard: If the cardboard box is dry and clean, flatten it and place it in the cardboard recycling collection.

Storage
Store at room temperature.

Country of manufacture
Estonia
