BioTroop Sani

Ready to use

WC and pipe cleaner

Intended use
BioTroop Sani is an effective sanitary cleaner for communal WC facilities in buildings, as well as WC facilities and blackwater systems on ships. The product removes limescale and urine scale, reduces the formation of deposits and thereby eliminates the sources of unpleasant odors. Facilities stay fresh. The product supports the operation of modern wastewater treatment systems and is suitable for both vacuum and gravity WC systems. BioTroop Sani is low foaming.

Appearance
Lightly fragranced liquid
Strongly acidic, pH 1.6–2.6

Contents
Citric acid <5%, isopropanol <5%, lactic acid <5%

Directions for use
Spray a small amount onto the surface, scrub with a brush and rinse.

Waste disposal
Empty, clean and dry plastic packaging can be taken to a plastic packaging collection point. Clean cardboard: If the cardboard box is dry and clean, flatten it and place it in the cardboard recycling collection.

Storage
Store at room temperature.

Country of manufacture
Estonia
